The FV4K-DCK-1x designed for dual camera inspection, surveillance, industrial and UAV applications. The flexibility of the system allows for a visible camera and an infrared or night vision camera. The hardware consists of a 3-board set: Input, Encoder and Connector PCB. The system is capable of encoding multiple channels of H.265 and H.264 video in 4K resolutions. The Input board features flexible digital and analog input ports. The encoder can be configured to stream over IP and simultaneously record to USB or micro SD card. This compact design only uses 4.5 watts of power when streaming from 2 cameras. The FV4K-DCK-1x is available with either software preloaded or with an optional SDK starter kit.
